

*Igni*Cognition Case Study A: EEG Scan Brain Age

69 years old, after *Igni*Cognition intake

Performance Assessments	Target ranges	After 90-days	After 1-year
Trail Making Test (Completion Time)	69-188 seconds	40 seconds	26 seconds
Physical Reaction Time	270-388 ms	292 ms	253 ms
Audio Reaction Time	297-385 ms	296 ms	276 ms
Operating Voltage Increase (P300)	6-15 μ V	22.2 μ V	19.6 μ V
Boone Brain Age	-	31 years	22 years

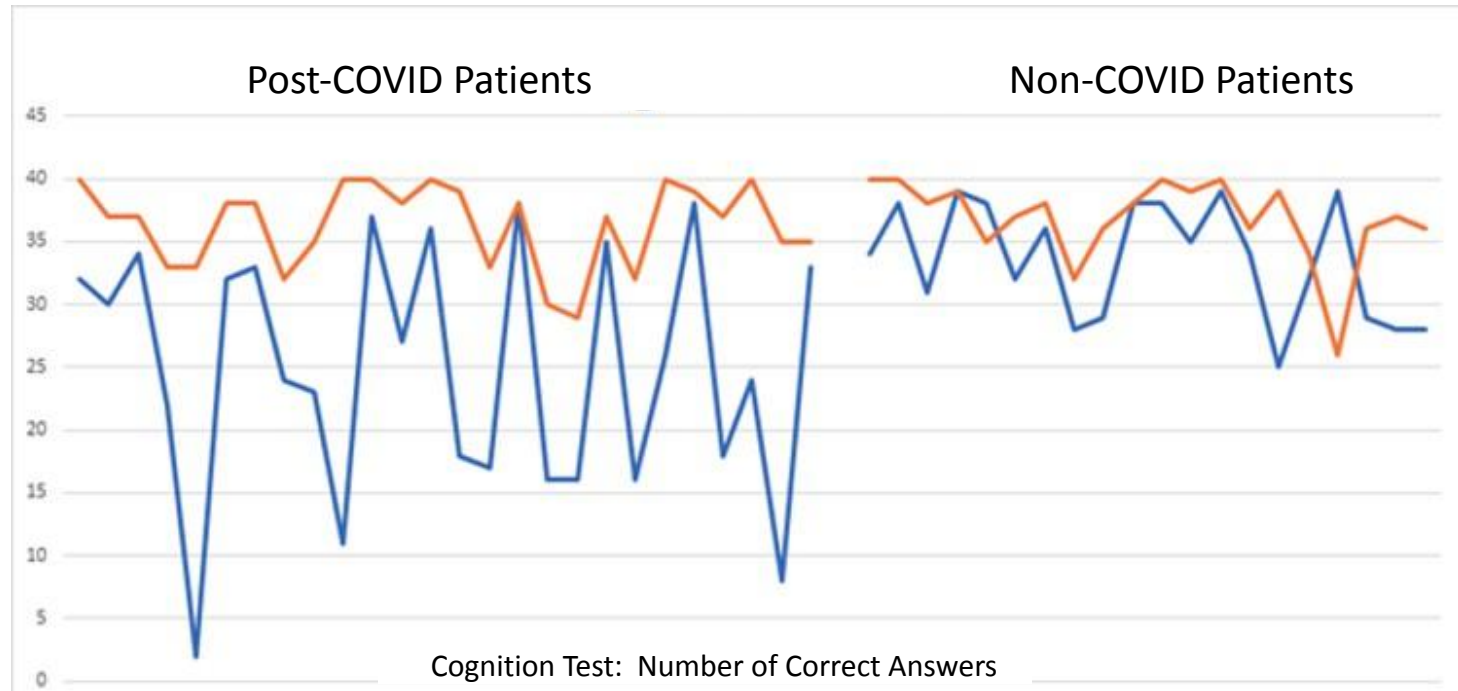

*Igni*Cognition Case Study B: EEG Scan Brain Age

63 years old, after 60-day *Igni*Cognition intake

Performance Assessments	Target ranges	Before	After 60-days
Trail making Test	69-188 seconds	56 sec	42 sec
Physical Reaction Time	270-388 ms	328 ms	318 ms
Audio Delay (Reaction Time)	297-385 ms	292 ms	288 ms
Operating Voltage Increase (P300)	6-15 μ V	9.8 μ V	13.6 μ V
Boone Brain Age		59 years	31 years

Orange – after 30 days of IgniCognition intake

Chromosomal Stability and Cellular Maintenance and Renewal

Signaling: IgniCognition + IgniLongevity Case Study A

The test results analyzed by **SpectraCell Laboratories** - a non-related third party, measuring Chromosome End length pre and post **igniton absorption**.

Case A

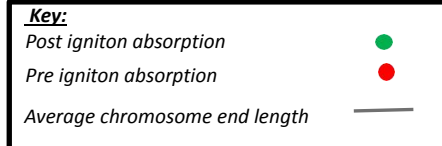

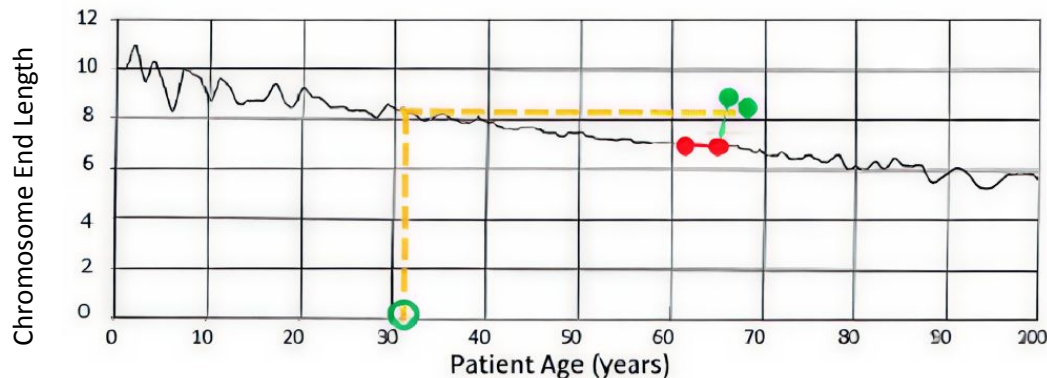

▪ Pre-absorption

- » test (7/1/2016, Age 62): **7.09kb**
- » test (7/25/2019, Age 65): **6.77kb** (- 4.5% decrease)

▪ Post-absorption

- » test (8/27/2020, Age 66): **8.95kb (+32.2% increase in 12 months)**
- » test (1/26/2022, Age 67): **8.24kb**

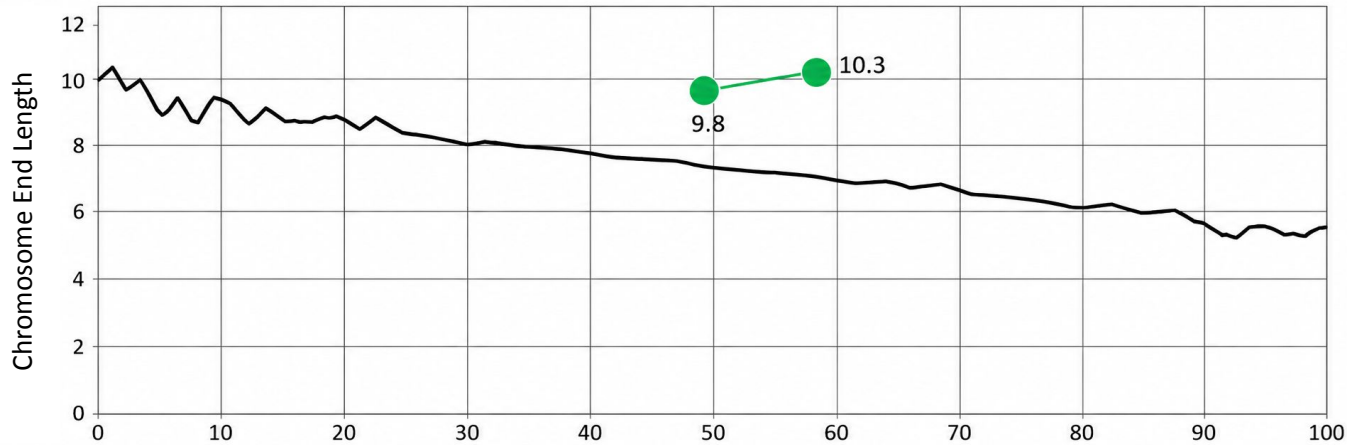

Biological age decreased to 31 years from 66 years

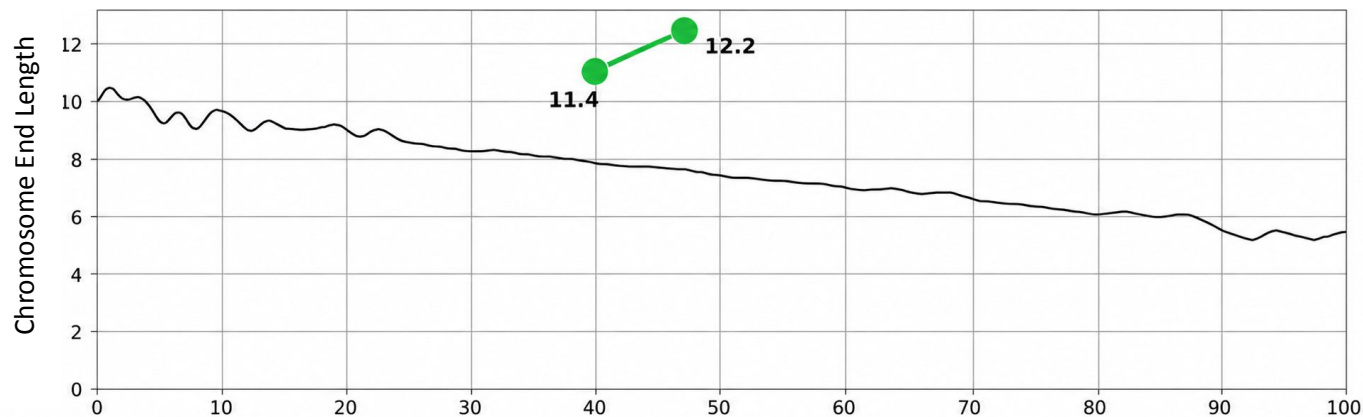

* The grey line on the graph represents tens of thousands of chromosome end length results obtained at SpectraCell Laboratories over the course of a decade, and indicates what the average chromosome end length is for people in different age groups

Chromosomal Stability and Cellular Maintenance and Renewal Signaling: IgniCognition + IgniLongevity Case Study B and C

Case B

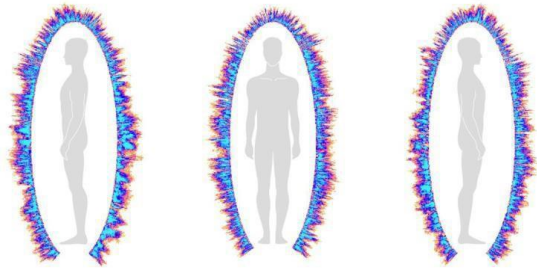

Case C

* The grey line on the graph represents tens of thousands of chromosome end length results obtained at SpectraCell Laboratories over the course of a decade, and indicates what the average chromosome end length is for people in different age groups

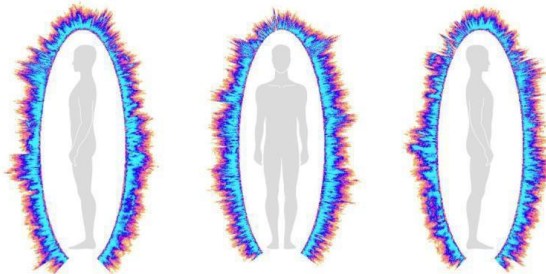

Increased Energy: IgniCognition + IgniLongevity Case Study A

Pre
Energy **380** Joules ($\times 10^{-3}$)

Energy reserves **17%**

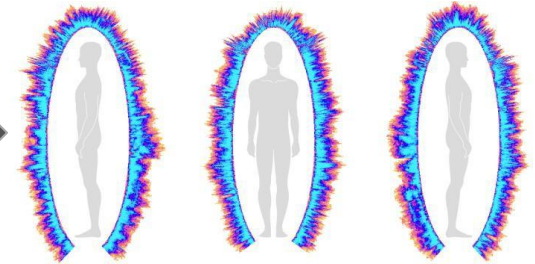

Post 11 Mo.
Energy **570** Joules ($\times 10^{-3}$)

Energy reserves **87%**

+11 months of Igniton Consumption

Post 26 Mo.
Energy **580** Joules ($\times 10^{-3}$)

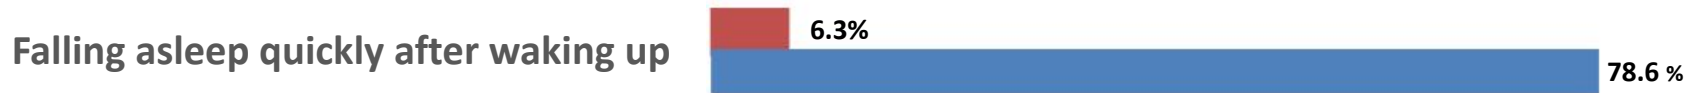

Energy reserves **89%**

+15 more months of Igniton Consumption

IgniREM Sleep 2026 Randomized Controlled Trial

Average hours of REM sleep: 25% Improvement

Before After 15 Days of *IgniREM* Sleep

Randomized Controlled Trial
N=60
