

BRAND GUIDELINES

Igniton

v1.0 · April 2026

LOGO VARIATIONS

Three approved color treatments. Choose the variation with the highest contrast against your background.

Always pull from master artwork. Never re-typeset, recolor outside this system, or rotate the wordmark.

Igniton

Primary · Navy on White

Igniton

Reverse · White on Navy

Igniton

Accent · Gold on Off-White

LOGO SCALE

Minimum sizes preserve legibility.

Print 16mm

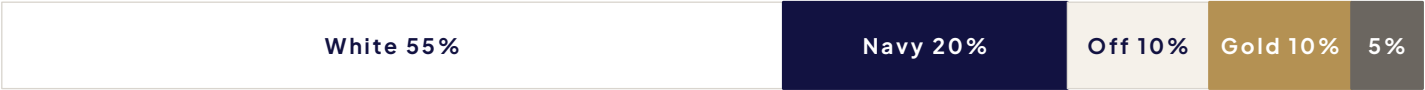

COLOR SYSTEM

Five colors. One mood: precise, premium, human.

White carries the brand. Navy holds the weight. Gold makes one thing matter at a time. Off-white softens. Warm gray supports.

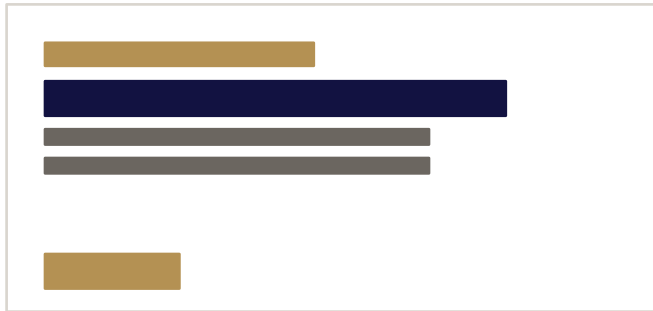

Proportion at a glance

COLOR USAGE

How the palette behaves in real layouts.

Standard Page

DEFAULT

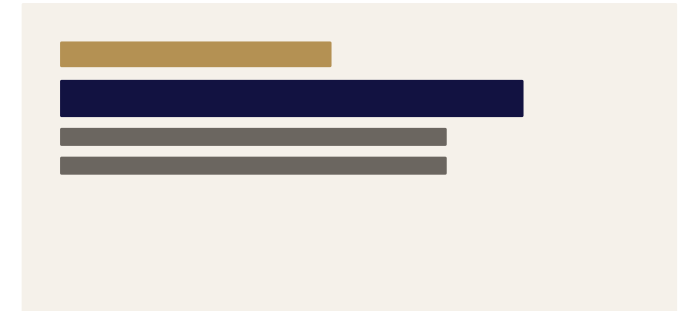

White dominates. Navy carries text. One gold accent per section — eyebrow, stat, or CTA.

Dark Sections

ACCENT

Navy for full-bleed hero bands and conclusion slides. Gold accents only — never as a flat block on its own.

Off-White Surfaces

SOFT

Off-white softens proof modules, testimonials, and product cards. Replaces stark white when warmth is needed.

TYPOGRAPHY

Display.

Playfair Display

Used for headlines, hero statements, product names, and quoted moments. Italic emphasizes a single word — never a sentence.
